BACK TO MONITOR CURRENT PROBES MASTER LIST

F-35-1 Current Probe

The F-35-1 has a transfer impedance of approximately 0.15Ω (± 2 dB) from 30 kHz to 100 MHz. The probe is capable of performing without saturation when measuring pulsed currents to 500 amperes and a duty cycle of 0.001 and 350 amperes of DC to 60 Hz and 100 amperes of 400 Hz powerline current.
